- **Subscription to Trading Signals in Telegram:** Stay informed with real-time trading signals to make timely and informed decisions.

Our Approach

At Robin Hood Trading Academy, we believe in the power of informed investing. Our flagship paradigm-shifting software system named **FinGAMBIT**, is an innovative, automated, self-primed, and self-adaptive trade facilitating tool, designed to safely mitigate the uncertainties and risks in the financial markets, by offering an extremely high probability for successfully executing trades in both directions of the market.

Instead of attempting to predict the market, **FinGambit** responds to all possible combinations and variations in price movement, by executing a calculated number of counter-balancing long and short trades, in such a way, that leads to always producing a final net positive end game outcome, within a given preset number of trials.

JOIN THE REVOLUTION IN SMART AI TRADING

Markets Don't Obey Standard Statistical Analysis But Rather Follow Probabilities

WALL Street is NOT a Friend of MAIN Street

Conventional main stream trade education institutions are promoting a false narrative called Technical Analysis, that supposedly provides the keys to the trading kingdom. Unfortunately, in actuality 90% of new traders that follow this concept, do lose 90% of their investment capital in the first 90 days of their initial trading activity.

What Smart Money doesn't want you to know is that in actuality they do have a serious CONFLICT of INTEREST with retail traders, as they always take the opposite side of your trade and thus your WIN is their LOSS and your LOSS is their WIN... They intentionally misleads you into believing fairy tails about Moving Averages forming Candlestick patterns and other fallacies like that, when the TRUTH is that Markets are RANDOM & UNPREDICTABLE and there are no 100% rules that obey them.

Each Trade when executed has a 50/50 chance of winning or losing - which can NOT be predicted, although over a large number of trades, the winners and losers average themselves out to an outcome that CAN be predicted!!!

This is where our innovative Market Neutral, Self-Primed, and Self-Adaptive Trade Facilitating Tool named FinGAMBIT, (with no analogs in the world), comes in to the RESCUE and show you the way to financial independence by achieving multiple streams of income in addition to what you do for a living.

FinGambit Demo Reel

FinGambit is an automated MT4 trade facilitating tool, that balances market moves to ensure profit or break even. It uses two parallel instances of MT4 that shar live market data to offset temporary losses with precise calculations. It successfully handles market shifts, in such a way keep trades to be always profitable. Watch the YT video below and if you have questions do not hesitate to contact us.

How To Legally Beat Smart Money At Their Own Game

We all know that Financial Markets are rigged by Smart Money and that the odds of winning are against you. Now you can find the way to reverse your fortune, by putting Robin Hood in your corner to set the odds in your favor once and for all...

In this unrelenting day and age, there is only one fundamental question, whose answer separates YOU from Financial Independence. And this question is "Where would the market go next - Up or Down"? As simple as it sounds, you will be amazed how hard in reality this question is. As the saying goes - "The Devil is in the Details"!
